

ENGINEER'S HAMMER - CARBON HANDLE Réf.: 0000191001

Caracteristics

2 in 1 hammer. French pattern. Patented conception: the only engineer's hammer with a mallet insert. Unlike metal inserts, the mallet insert on the hammer DUO allows for a powerful use even with the soft side. Exchangeable nylon insert (80D Shore). C45E high carbon steel head. Forged head, with heat treatment. Induction-hardened working surfaces (54 HRC). Finely polished working parts. Epoxy powder painting (electrostatic process), followed by baking. The nozzle is made by a hydraulic machine, a stress sensor measures on each product the power of the nozzle, then a pressure sensor controls the installation of the resin. The pull-out performance is much higher than the standards and is the trademark of MOB tooling. Unbreakable Carbon handle, made of 4 components: unbreakable fiberglass core, 2 carbon fibre bars, anti-vibration polypropylene and elastomer for a good grip. Completely ergonomic. Dry and precise strikes. Lateral strike possible. Space-saving: 2 in 1 transport. Probably the best hammer in the world.
