

## SYNTHETIC DYE - OCHRE Réf.: 302540

### Characteristics

In 500ml jar

Allows you to add color to cement floors, slabs, screeds, tiles, terrazzo, terrazzo, mosaics, coatings, plaster, interlocking paving stones, etc.

- The color remains stable whatever the material used
- Wide variety of colors with strong coloring power

USE :

- The coloring must be mixed with dry cement. Add the sand then the water last.
- The dosage is carried out by weight in relation to the cement. The percentage ranges from 1 to 6% depending on the desired shade.
- The rendering varies depending on the quantities of pigment but also the aggregates used. It is very important to carry out a test on a small area to validate the desired color before starting work. The density of the dye varies depending on the color.
- Take into account the weight and not the volume.
