

ENGINEERS' HAMMER Réf.: 5081030500

Caracteristics

English pattern with a ball pein. Round face. Originally used by mechanics in England, who seek both power and precision, but also the ability to shape steel parts. Head: C45E high carbon steel head. Forged head, induction-treated working surfaces. Polished. Hickory handle: hardwood of high density, suitable for intensive or frequent use. The connection between the head and steel is made by a hydraulic machine. A stress sensor measures on each product the power of the nozzle, then a pressure sensor controls the installation of the resin. High performance: a trademark of MOB tools.
