

BENDING BAR Réf.: 0183060601

Caracteristics

Traditional tool for structural work in masonry. Used as a lever to bend reinforcing bars by masons or by steelworkers responsible for working steel on the site. High quality one-piece forged steel: «1 piece» not welded. Light and resistant models. Sizes adapted for each iron diameter, two diameters per claw. Textured, epoxy, electrostatically applied and baked paint, evenness of the paint surface and resistance to impact and abrasion of the surface. Manufactured in our factories.
