

'DYNACHOC' WOODEN MALLET - WITH FIBREGLASS BANDS AND HICKORY HANDLE Réf.: **0331060301**

Characteristics

The know-how of MOB was integrated following the acquisition of Dynachoc in 1999. Dynachoc, a specialist in "soft" printing, had know-how complementary to that of MOB. The name "Dynachoc" continues through its flagship range of lamellé-fret mallets.

SPECIAL SHAPE.

This version of the mallet has a flat face and a curved face.

PERFORMANCE: HIGH DENSITY AND HOMOGENEOUS.

The head is made of glued-laminated wood, particularly stable.

Renowned for its very high mechanical strength (bending, compression, torsion), it has a straightness and homogeneity superior to solid wood.

BANDING.

2 sets of fiberglass wrap around the wood mass, ensuring that the crossed layers are maintained during strong and intensive strokes, for optimized durability.

The fibers are colored green to indicate their presence.

QUALITY.

Compressed wood mallet with recessed fibreglass.

Hickory handle: high density hardwood, suitable for intensive use.

Self-locking assembly.
