

COPPER HAMMER - COMPOSITE Réf.: 0365060701

Characteristics

Used in industry to strike without damaging parts. Density: 8.9g/cm³. 100% phosphorus deoxidized copper head - forged for extra strength. Properties: conductive, explosion-proof. 45° chamfered head. Knocked down angles. 4-material handle: rigidity and precision. 1. Fiberglass with additives: strength and resistance. 2. Carbon fiber, used for advanced technologies, which, combined with the other 3 materials, increases the stiffness of the core in the direction of strike by 12%. 3. Anti-vibration: polypropylene: absorbs 10 times more vibration than a conventional handle. 4. Comfort: flexible, textured and ribbed elastomer: a comfortable and effective grip, "anti-blister". Caution: Copper being a malleable material, its lifespan is limited and its deformations significant. Do not use as soon as the handle begins to come off. Surface oxidation is normal, it does not alter the qualities of the product.
