

PHZ 1/4 - C6,3 Réf.: 20510

Caracteristics

INNOVATION: who doesn't know the problem! You have to fix a Pozidriv screw but you only have a Phillips bit available or vice versa. The PHZ-Bit from Schröder offers the solution: it can be used either for Pozidriv or Phillips screws. It can easily be recognized by its shape and the golden tip. The bit is coated on a titanium nitride basis, so that the PHZ-Bit is also highly durable. Specially for carpenters and dry mortarless constructors, the PHZ-Bit offers big advantages, because the screws in this field often have both types of drive, Pozidriv and Phillips. With the PHZ-Bit you only need sizes 1, 2 and 3 and they cover 6 sizes of Pozidriv and Phillips screw. **CHARACTERISTICS:** the tip is in Zirconium nitride (ZrN).
