

6X6 POINT OFFSET SOCKET WRENCHES SETS Réf.: 9015010001

Caracteristics

NF ISO 2236. 6 point opening. Long service life is achieved by using forged steel alloyed with chromium and vanadium. Controlled heat treatment gives it the hardness to withstand heavy use. The key openings are broached, a technology that produces very precise dimensions and a high-quality surface finish. The profile of the polygonal heads has been specially designed to avoid damaging the corners of the nuts. The wrenches are comfortable to grip when tightening hard. The spanners are protected by chrome plating. The surfaces are finished to a very high standard for tactile comfort and easy cleaning. All our spanners comply with current NF, DIN and ISO standards. The strength of Mob keys far exceeds ISO specifications. This performance helps reduce fatigue for professionals who use their tools intensively. Open-end spanner: the protrusion of the threaded shank does not interfere with tightening. The spanner is angled at 95° to keep the hand clear of the clamping surface. Large depth of screw reception on the blocked part of the spanner. Entry chamfer to facilitate spanner engagement.
