The 5° angle of rotation (72-tooth ratchet) ensures high performance in tight spaces. The ratchet heads have a small footprint to provide maximum accessibility. Round head: changing the direction of tightening is easily done with the thumb around the entire circumference of the head. Comfortable dual-material handle designed for working in all positions: polypropylene for more resistance, elastomer for good grip. Body-handle connection of the ratchet studied so as not to interfere with the hand when gripping. **SOCKETS:** The elimination of the sharp angles of the squares increases their resistance and protects the nuts against caulking. The handling of the casings is made easy thanks to an external shoulder provided for the grip. Dimension marking all around. Hex sockets for powerful tightening.
